Experimental design and positions of near-infrared spectroscopy (NIRS) probes. A: Photograph and schematic diagram of the test pieces (circle, ellipse, square.

Figure 1: Schematic diagram of an AGN, an active supermassive black hole with violent activity. When we take infrared slit-spectroscopy observations (Figure 3). Fig 3.1 Schematic diagram of Laser Raman spectroscopy. A: Schematic principle further manipulation. Fig 3.2 Schematic optical diagram of FTIR spectrometer. Figure 1: Schematic diagram of the experimental s-SNOM setup using broadband synchrotron radiation in the IR regime from the electron storage ring MLS.

A general understanding of spectroscopy techniques is required for the 2014 AP Chemistry exam. Figure 2: IR and UV-Vis Spectroscopy Schematic Diagram. A: Diagram showing the wavelength at which different atmospheric gases have absorption bands. Note that a particular gas also has lower absorption bands in the infrared spectrum. For characterization of the compound IR, NMR and Mass spectra were performed. IR was Schematic diagram for the isolation of flavonoids from E. neriifolia.
